

Alberta Mennege Stichting – Selectie uit de gehonoreerde aanvragen 2014-2015

MSc - veldwerk in Tresor, Frans Guiana:
“Regenwoud in de klas”

PhD - project:
Vervaardiging van een geschilderde ‘artist impression’, *Mare aux Songes* op Mauritius

MSc - bezoek aan Kopenhagen en Leiden:
Medicinal and other useful plants from *Historia Naturalis Brasiliae* (1648): “Are they currently used in Brazil?”

Research associate -
Aanstelling in verband met voorbereiding heruitgave Bomenboek voor Suriname

PhD - veldwerk in Malaysia, Brunei:
Phylogeny and Biogeography of *Calamus javensis* Blume complex (Arecaceae, Calamoideae)

MSc - marktonderzoek in Brussel:
Market survey on medicinal plant trade by African immigrants in Matonge-Ixelles, Brussels

MSc - project in Storrs, Connecticut, VS:
Evolutionary lability of stomata in *Pelargonium*

MSc -1 maand veldwerk in Fr. Gui.:
Taxonomic revision of family *Myristicaceae* in the Guianas and the use of barcoding for identification.

Postdoc – veldwerk in de Guianas:
Taxonomy and plant uses of the Lamiaceae family in the Guianas

MSc - veldcursus op Bonaire: Tropical Biodiversity and Field Methods

PhD - veldwerk in Mexico:
Tolerantie verschillen tussen individuen bij verstoring en de consequenties voor populatie dynamica in de Mexicaanse ondergroeipalm *Chamaedorea elegans*.

PhD - De kosten van sequenzen in Wageningen:
Evolution of androdioecy in Neotropical woody plants: a phylogenetic approach:.

MSc – veldwerk in Manaus, Brazilië: Traits associated with canopy microhabitat conditions in the Amazonian *Lejeuneaceae*

PhD - verblijf in Fayette, USA:
research and training visit

MSc - veldwerk in Uruguay:
How do trees expand into South American subtropical grasslands? The role of seed sources, nurse plants en herbivores.

PhD - veldwerk in Hong Kong:
Antagonism in mycorrhizal networks: a plot study in Hong Kong (China)

PhD - veldwerk in Gabon:
The evolution of niches: a case study in Annonaceae

PhD - Congresbezoek in Zuid Afrika:
DNA barcoding of *Pelargonium* samples: mixed success and possible new species.

MSc - veldwerk in St. Eustatius:
Marine biodiversity survey

PhD - veldwerk in Panama:
De rol van plantengeurstoffen in het mutualisme tussen vijgenbomen en vijgenwespen

PhD - Congresbezoek Hawaii:
'Functional diversity of leaf traits in tropical tree communities across environmental gradients'.

PhD - veldwerk en werkbezoek op Tenerife en in Bordeaux:
A xylem physiological approach to better understand insular woodiness on the Canary Islands: is drought stress involved?

MSc - veldwerk in Suriname:
Sustainable management of natural resources and conservation of biodiversity in the tropical rainforest of Surinam: palm harvesting

PhD – Congresbezoek in Portugal:
“Ascomycete fungal communities reorganize in response to long-term summer and winter climate warming in moist and dry tundra of Arctic Alaska”.
